

## Transport and Communication

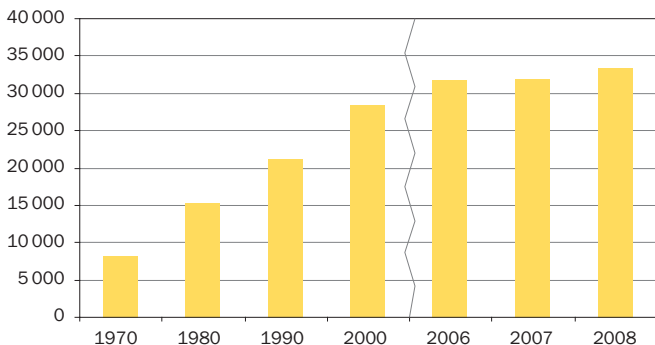

Liechtenstein's road network consists of around 120 km of ordinary roads and over 260 km of local community roads. There is a very well developed public transport bus network in Liechtenstein. Also in Liechtenstein, Austrian Federal Railways operate a 9 kilometre-long railway line with 4 stops. This line links Feldkirch in Austria to Buchs in Switzerland.

The level of motorisation is very high. There are around 700 passenger cars for every 1 000 inhabitants, which represents a peak value in Europe. In the neighbouring countries of Switzerland and Austria around 500 passenger cars per 1 000 inhabitants are in use.

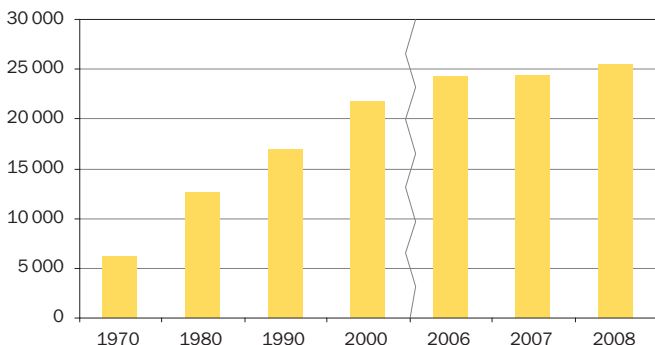

### Motor vehicles, 1970 - 2009

Year (1 July)	Motor vehicles		Cars	
	number	per 1 000 inhabitants	number	per 1 000 inhabitants
1970	8 208	392	6 210	297
1980	15 269	592	12 569	487
1990	21 233	746	16 891	594
2000	28 447	866	21 784	672
2007	31 900	907	24 368	693
2008	33 365	941	25 462	718
2009	34 014	956	25 909	728
